I. INTRODUCTION

1. Plaintiffs Ahold USA, Inc., César Castillo, Inc., FWK Holdings, L.L.C., KPH Healthcare Services, Inc., a/k/a Kinney Drugs, Inc., and Rochester Drug Co-Operative, Inc., on behalf of themselves and all others similarly situated, bring this Class Action Complaint on behalf of a Class (defined below) of direct purchasers who purchased generic ursodiol 300 mg capsules (“Ursodiol”) directly from Defendants Actavis Holdco U.S., Inc., Lannett Company, Inc., or Epic Pharma, LLC.

2. In the pharmaceutical industry, the entry of generic versions of branded drugs usually results in aggressive price competition, which in turn reduces prices for drug wholesalers, retail pharmacies, consumers, and third-party payors. Defendants here, however, conspired to thwart the economic benefits of generic competition.

3. This is a civil action seeking treble damages arising out of the Defendants’ unlawful scheme to fix, maintain, and stabilize prices, rig bids, and engage in market and customer allocation of Ursodiol. As set forth below, Defendants’ scheme violates Section 1 of the Sherman Act, 15 U.S.C. § 1. Defendants were not alone in subverting the operation of a competitive marketplace for generic pharmaceuticals. Defendants’ anticompetitive conduct in the Ursodiol market is part of a larger conspiracy or series of conspiracies involving many generic pharmaceutical manufacturers and many generic pharmaceuticals.

4. Plaintiffs’ allegations are based on personal knowledge of these matters relating to themselves and upon information and belief as to all other matters. Parts of Plaintiffs’ allegations are based on information made public during ongoing government investigations of Defendants and other generic pharmaceutical companies for alleged unlawful price-fixing and other conduct in the generic pharmaceutical industry.

5. Ursodiol is a widely-prescribed drug to treat gallstones. A bile acid, it works by decreasing the production of cholesterol and by dissolving the cholesterol in bile so that it cannot form stones.

6. Ursodiol has been available in the United States as a generic since 2000, and the market for Ursodiol is mature. Defendants dominate the market for Ursodiol.

7. Beginning in approximately May 2014, and continuing today (the “Class Period”), Defendants and co-conspirators engaged in an overarching anticompetitive scheme in the market for Ursodiol to artificially inflate prices through unlawful agreements. Defendants caused the price of these products to dramatically and inexplicably increase as much as [REDACTED] higher than April 2014 prices, as alleged in Section V(B)(3) herein. The United States Government Accountability Office (“GAO”) singled out Ursodiol as an example of a generic pharmaceutical that “experienced an extraordinary price increase.”¹ This increase was the consequence of an agreement among Defendants to increase pricing and restrain competition for the sale of Ursodiol in the United States. Defendants orchestrated their conspiracy through secret communications and meetings, both in private and at public events, such as trade-association meetings held by the Generic Pharmaceutical Association (“GPhA”) (now called the Association for Accessible Medicines),² the Healthcare Distribution Management Association (“HDMA”) (now called the Healthcare Distribution Alliance), the Minnesota Multistate Contracting Alliance for Pharmacy (“MMCAP”), the National Association of Chain Drug Stores (“NACDS”), and Efficient Collaborative Retail Marketing (“ECRM”), among others.

¹ GAO Report to Congressional Requesters, *Generic Drugs Under Medicare* (Aug. 2016), available at <http://www.gao.gov/assets/680/679055.pdf>.

² See Russell Redman, *New name for Generic Pharmaceutical Association*, CHAIN DRUG REVIEW (Feb. 14, 2017), available at <http://www.chaindrugreview.com/new-name-for-generic-pharmaceutical-association/>.

8. Defendants' and other generic pharmaceutical manufacturers' conduct has resulted in extensive scrutiny by federal and state regulators, including by the Antitrust Division of the United States Department of Justice ("DOJ"), the United States Senate, the United States House of Representatives, and at least 45 attorneys general from 44 states and the District of Columbia (the "State AGs"). The DOJ empaneled a federal grand jury in this District, which has issued subpoenas relating to price-fixing and other anticompetitive conduct in the generic pharmaceutical industry, including to Defendants Actavis and Epic.

9. The DOJ's and State AGs' investigations followed a congressional hearing and investigation prompted by the National Community Pharmacists Association's ("NCPA") January 2014 correspondence to the United States Senate Health Education Labor and Pensions ("HELP") Committee and the United States House Energy and Commerce Committee requesting hearings on significant spikes in generic pharmaceutical pricing.³ The NCPA's news release reported price hikes on essential generic pharmaceuticals exceeding 1,000% in some instances, according to its survey of over a thousand community pharmacists, resulting in some patients being forced to leave their prescriptions at the pharmacy counter due to increased copays, and forcing more seniors into Medicare's coverage gap (or "donut hole") where they must pay far higher out-of-pocket costs.

10. On December 12 and 13, 2016, the DOJ filed its first criminal charges against two former executives of Heritage Pharmaceuticals: Jeffrey Glazer and Jason Malek. *See United States of America v. Jeffrey A. Glazer*, No. 2:16-cr-00506-RBS (E.D. Pa.); *United States of America v. Jason T. Malek*, No. 2:16-cr-00508-RBS (E.D. Pa.). The DOJ alleged that both

³ News Release, *Generic Drug Price Spikes Demand Congressional Hearing, Pharmacists Say* (Jan. 8, 2014), available at <http://www.ncpanet.org/newsroom/news-releases/2014/01/08/generic-drug-price-spikes-demand-congressional-hearing-pharmacists-say>.

Glazer and Malek conspired with others “to allocate customers, rig bids, and fix and maintain prices” of generic glyburide and doxycycline sold in the United States. Each was charged with two felony counts under the Sherman Act, 15 U.S.C. § 1. On January 9, 2017, both Glazer and Malek pleaded guilty to the charges. They continue to cooperate with the DOJ’s ongoing investigation as they await sentencing.

11. The DOJ has publicly acknowledged that its investigation overlaps with MDL 2724. For example, the DOJ filed a motion for a stay of discovery in MDL 2724 noting that:

Evidence uncovered during the criminal investigation implicates other companies and individuals (including a significant number of the Defendants here) in collusion with respect to doxycycline hyolate, glyburide, and other drugs (including a significant number of the drugs at issue here).⁴

12. Soon after the DOJ filed criminal charges, 20 state attorneys general led by the State of Connecticut also sued generic manufacturers Aurobindo, Citron, Heritage, and Teva, as well as Mylan and Mylan for bid rigging, price-fixing, and market and customer allocation in connection with their sale of generic glyburide and doxycycline in the United States. On March 1, 2017, the complaint in the State AGs’ action was amended to, *inter alia*, add claims of an additional 20 state attorneys general, bringing the total number of State AGs prosecuting the action to 40. Glazer and Malek entered into settlement agreements with the attorneys general on March 16, 2017.⁵ Commenting on the scope of its current antitrust investigation, the Connecticut Attorney General (“CTAG”) George Jepsen stated that “[t]he issues we’re

⁴ See Intervenor United States’ Motion to Stay Discovery, *In re: Generic Pharm. Pricing Antitrust Litig.*, MDL No. 2724, ECF 279 (E.D. Pa. May 1, 2017).

investigating go *way beyond* the two drugs and six companies. *Way beyond... We're learning new things every day.*⁶ On July 17, 2017, 5 additional attorneys general joined the action by filing a nearly identical complaint and a notice of related case.⁷

13. As noted above, the State AGs' and DOJ's investigations are ongoing. Just last week, Pfizer Inc. reported in an SEC filing dated August 10, 2017 that:

As of July 2017, the U.S. Department of Justice's Antitrust Division is investigating our Greenstone generics business. We believe this is related to an ongoing antitrust investigation of the generic pharmaceutical industry. The government has been obtaining information from Greenstone.

14. As a result of Defendants' scheme to fix, maintain, and stabilize prices; rig bids; and engage in market and customer allocation of Ursodiol, direct purchasers paid, and continue to pay, supracompetitive prices for Ursodiol.

15. Plaintiffs, on behalf of themselves and members of a direct purchaser class, seek damages caused by Defendants' and co-conspirators' violations of Section 1 of the Sherman Act, 15 U.S.C. § 1.

II. JURISDICTION AND VENUE

16. This Court has jurisdiction over the subject matter of this action as it arises under Section 1 of the Sherman Act, 15 U.S.C. § 1, and Section 4 of the Clayton Act, 15 U.S.C. § 15. Further, this Court has jurisdiction under 28 U.S.C. §§ 1331, 1337(a).

17. Venue is proper in this District pursuant to 15 U.S.C. §§ 15 and 22, and 28 U.S.C. § 1391(b), (c), and (d), because during the Class Period Defendants transacted business

⁶ Liz Szabo, et al., *How Martinis, Steaks, and a Golf Round Raised Your Prescription Drug Prices*, THE DAILY BEAST (Dec. 21, 2016), available at <http://thebeast.com/2haV9xg> (emphasis added).

⁷ *Arkansas v. Aurobindo Pharma USA, Inc.*, No. 17-cv-1180 (D. Conn.).

throughout the United States, including in this District, Defendants resided, were found, or had agents within this District, and a portion of the affected interstate trade and commerce discussed below was carried out in this District.

18. During the Class Period, Defendants sold and distributed generic pharmaceuticals in a continuous and uninterrupted flow of interstate commerce, which included sales of Ursodiol in the United States, including in this District. Defendants' conduct had a direct, substantial, and reasonably foreseeable effect on interstate commerce in the United States, including in this District.

19. This Court has personal jurisdiction over each Defendant because, *inter alia*, each Defendant: (a) transacted business throughout the United States, including in this District; (b) participated in the selling and distribution of Ursodiol throughout the United States, including in this District; (c) had and maintained substantial contacts within the United States, including in this District; and/or (d) was engaged in an unlawful conspiracy to inflate the prices for Ursodiol that was directed at and had the intended effect of causing injury to persons residing in, located in, or doing business throughout the United States, including in this District.

III. PARTIES

A. Plaintiffs

20. Plaintiff Ahold USA, Inc. ("Ahold") is a Maryland corporation with its principal places of business in Quincy, Massachusetts and Carlisle, Pennsylvania. During the Class Period, Ahold purchased Ursodiol directly from one or more Defendants. As a result of Defendants' antitrust conspiracy, Ahold paid supracompetitive prices for its Ursodiol purchases and was injured by the illegal conduct alleged herein.

21. Plaintiff César Castillo, Inc. ("CCI") is a Puerto Rico corporation with its principal place of business in Rio Piedras, Puerto Rico. During the Class Period, CCI purchased

Ursodiol directly from one or more Defendants. As a result of Defendants' antitrust conspiracy, CCI paid suprareactive prices for its Ursodiol purchases and was injured by the illegal conduct alleged herein.

22. Plaintiff FWK Holdings, LLC ("FWK") is an Illinois corporation with its principal place of business in Glen Ellyn, Illinois. FWK is the assignee of antitrust claims possessed by Frank W. Kerr Company ("Kerr") and brings this action as successor-in-interest to Kerr's claims arising from its purchase of Ursodiol directly from one or more of the Defendants during the Class Period. As a result of Defendants' antitrust conspiracy, FWK, through assignor Kerr, paid suprareactive prices for its Ursodiol purchases and was injured by the illegal conduct alleged herein.

23. Plaintiff KPH Healthcare Services, Inc. a/k/a Kinney Drugs, Inc. ("KPH") is a New York corporation with its principal place of business in Gouverneur, New York. KPH operates retail and online pharmacies in the Northeast under the name Kinney Drugs, Inc. During the Class Period, KPH directly purchased Ursodiol from one or more of the Defendants. As a result of Defendants' antitrust conspiracy, KPH paid suprareactive prices for its Ursodiol purchases, and KPH was injured by the illegal conduct alleged herein.

24. Plaintiff Rochester Drug Co-Operative, Inc. ("RDC") is a New York corporation with its principal place of business in Rochester, New York. During the Class Period, RDC purchased Ursodiol directly from one or more of the Defendants at artificially and unlawfully inflated prices. As a result of Defendants' antitrust conspiracy, RDC paid suprareactive prices for its Ursodiol purchases, and RDC was injured by the illegal conduct alleged herein.

B. Defendants

25. Defendant Actavis Holdco U.S., Inc. (“Actavis”) is a Delaware corporation with its U.S. headquarters in Parsippany, New Jersey. During the Class Period, Actavis sold Ursodiol to purchasers in this District and throughout the United States.

26. Defendant Lannett Company, Inc. (“Lannett”) is a Delaware corporation with its principal place of business in Philadelphia, Pennsylvania. During the Class Period, Lannett sold Ursodiol to purchasers in this District and throughout the United States.

27. Defendant Epic Pharma, LLC (“Epic”) is a Delaware limited liability company with its principal place of business in Laurelton, New York. During the Class Period, Epic sold Ursodiol to purchasers in this District and throughout the United States.

28. Defendants and their officers, agents, employees, or representatives have engaged in the conduct alleged in this Complaint while actively involved in the management of Defendants’ business and affairs.

C. Co-Conspirators

29. Various other persons, firms, entities, and corporations, not named as Defendants in this Complaint, have participated as co-conspirators with Defendants in the violations alleged herein, and have aided, abetted, and performed acts and made statements in furtherance of the conspiracy.

30. The true names and capacities of additional co-conspirators, whether individual, corporate, associate, or representative, are presently unknown to Plaintiffs. Plaintiffs may amend this Complaint to allege the true names and capacities of additional co-conspirators as they are discovered.

31. At all relevant times, other persons, firms, and corporations, referred to herein as "co-conspirators," the identities of which are presently unknown, have willingly conspired with Defendants in their unlawful scheme as described herein.

32. The acts alleged herein that were done by each of the co-conspirators were fully authorized by each of those co-conspirators, or were ordered or committed by duly authorized officers, managers, agents, employees, or representatives of each co-conspirator while actively engaged in the management, direction, or control of its affairs.

33. The wrongful acts alleged to have been done by any one Defendant or co-conspirator were authorized, ordered, or done by its directors, officers, managers, agents, employees, or representatives while actively engaged in the management, direction, or control of such Defendant's or co-conspirator's affairs.

IV. INTERSTATE TRADE AND COMMERCE

34. Defendants are the leading manufacturers and suppliers of Ursodiol sold in the United States.

35. Ursodiol is produced by or on behalf of Defendants or their affiliates in the United States or overseas.

36. During the Class Period, Defendants, directly or through one or more of their affiliates, sold Ursodiol throughout the United States in a continuous and uninterrupted flow of interstate commerce, including through and into this District.

37. The activities of Defendants and their co-conspirators were within the flow of, intended to, and had a substantial effect on interstate commerce in the United States.

38. Defendants' and their co-conspirators' conduct, including the marketing and sale of Ursodiol, took place within, has had, and was intended to have, a direct, substantial, and reasonably foreseeable anticompetitive effect upon interstate commerce within the United States.

39. The conspiracy alleged in this Complaint has directly and substantially affected interstate commerce in that Defendants deprived Plaintiffs of the benefits of free and open competition in the purchase of Ursodiol within the United States.

40. Defendants' agreement to fix, maintain, and stabilize prices, rig bids, and engage in market and customer allocation of Ursodiol, and their actual inflating, fixing, raising, maintaining, or artificially stabilizing Ursodiol price, were intended to have, and had, a direct, substantial, and reasonably foreseeable effect on interstate commerce within the United States.

V. FACTUAL ALLEGATIONS

A. The Generic Drug Market Is a Commodities Market, Where Competition Historically Has Been Keen.

1. Generic drugs should lead to lower prices.

41. Generic drugs provide a lower-cost but bioequivalent alternative to brand drugs.

Before any generic drug can be marketed, the Food and Drug Administration (the "FDA") requires rigorous testing to ensure it has the same strength, quality, safety, and performance as the brand. By law, generics must have the same amount of active ingredient and must be "therapeutically equivalent" to the brand, meaning they must meet exacting bioequivalence testing specifications so patients can expect "equal effect and no difference when [generics are] substituted for the brand name product."⁸

42. To encourage the production and sale of generic drugs, the Drug Price Competition and Patent Term Restoration Act of 1984 (the "Hatch-Waxman Act") simplified the regulatory hurdles that generic pharmaceutical manufacturers have to clear prior to marketing and selling generic pharmaceuticals. Instead of filing a lengthy and costly New Drug

⁸ FDA, *Drugs@FDA Glossary of Terms*, available at <http://www.fda.gov/Drugs/InformationOnDrugs/ucm079436.htm#G>.

Application, the Hatch-Waxman Act allows generic pharmaceutical manufacturers to obtain FDA approval in an expedited fashion.

43. To obtain marketing approval for a generic pharmaceutical, an Abbreviated New Drug Application (“ANDA”) must be filed with the FDA’s Center for Drug Evaluation and Research, Office of Generic Drugs; “abbreviated” because so long as the ANDA includes data showing bioequivalence to the brand, the ANDA sponsor can reference efficacy data supporting approval of the brand (described in the regulations as the “Reference Listed Drug” or “RLD” for short) instead of repeating all the same clinical trials. Upon the FDA’s determination that bioequivalence to the brand has been established, the ANDA will be approved and may be marketed in the United States as substitutable with the RLD.

44. Although equivalent from a safety and efficacy standpoint, generic versions of brand name drugs are priced significantly below their brand counterparts, and because of this, they rapidly gain market share from the brand beginning immediately following launch. Indeed, in every state, pharmacists are permitted (and in many states required) to substitute a generic product for a brand product barring a note from a doctor that the brand product must be dispensed as written.

45. It is well established in economic literature that competition by generic products results in lower prices for drug purchasers. In the period before generic entry, a brand drug commands 100% of the market share for that drug and the brand manufacturer can set the price free from competitive market forces. But once the first lower-priced generic enters, a brand drug rapidly loses sales due to automatic pharmacy counter substitution, and generics capture as much as 80% of the market or more within months of launch. And as more generics become available, generic prices only decline further due to competition among generics. These cost reductions to

drug purchasers were the very legislative purpose behind the abbreviated regulatory pathway for generic approval under the Hatch-Waxman Act.

46. Generic competition, under lawful and competitive circumstances, reduces drug costs by driving down the prices of both generic versions of the brand drug and often the brand drug itself, and every year generic drugs result in hundreds of billions of dollars in savings to consumers, insurers, and other drug purchasers.

47. A Federal Trade Commission study found that in a “mature generic market, generic prices are, on average, 85% lower than the pre-entry branded drug prices.”⁹ A mature generic market, such as the market for Ursodiol, has several generic competitors. Because each generic is readily substitutable for another generic of the same brand drug, the products behave like commodities, with pricing being the main differentiating feature and the basis for competition among manufacturers.¹⁰ Over time, generics’ pricing nears the generic manufacturers’ marginal costs.

48. Generic competition usually enables purchasers to purchase generic versions of the brand drug at a substantially lower price than the brand drug. Generic competition to a single blockbuster brand drug can result in billions of dollars in savings to direct purchasers, consumers, insurers, local, state, and federal governments, and others. Indeed, one study found

⁹ Federal Trade Commission, *Pay-for-Delay: How Drug Company Pay-Offs Cost Consumers Billions*, at 8 (Jan. 2010), available at <https://www.ftc.gov/reports/pay-delay-how-drug-company-pay-offs-cost-consumers-billions-federal-trade-commission-staff>.

¹⁰ See, e.g., Federal Trade Commission, *Authorized Generic Drugs: Short-Term Effects and Long-Term Impact*, at 17 (Aug. 2011) (“[G]eneric drugs are commodity products marketed to wholesalers and drugstores primarily on the basis of price.”), available at <https://www.ftc.gov/reports/authorized-generic-drugs-short-term-effects-long-term-impact-report-federal-trade-commission>; U.S. Cong. Budget Office, *How Increased Competition from Generic Drugs Has Affected Proceed and Returns in the Pharmaceutical Industry* (July 1998), available at <https://www.cbo.gov/sites/default/files/105th-congress-1997-1998/reports/pharm.pdf>.

that the use of generic drugs saved the United States healthcare system \$1.68 trillion between 2005 and 2014.¹¹

2. Prescription drug prices in the United States are governed by institutional safeguards, which are intended to keep drug prices competitive.

49. Ordinarily, the price for a consumer product is set by the retailer based on the amount the typical consumer is willing to pay. But because of the unique features of the prescription drug marketplace, prescription drug pricing for most consumers is not determined between the retailer and the consumer. Rather, because most consumers' prescription drug purchases are reimbursed by public or private health plans, consumer pricing for prescription drugs is determined by reimbursement agreements between these prescription drug payers, *i.e.*, health plans and their prescription benefit managers, and the pharmacies that dispense drugs to the payers' insured customers.

50. Generic manufacturers typically report a Wholesale Acquisition Cost ("WAC") for their drugs. WAC prices represent the manufacturer's benchmark or reported list price. The WAC typically functions as the manufacturer's list or benchmark price in sales to wholesalers or other direct purchasers and typically does not include discounts that may be provided, *e.g.*, for volume sales. Manufacturers generally provide their WACs to purchasers or report them to publishers that compile that information for the market.¹²

¹¹ GPhA, GENERIC DRUG SAVINGS IN THE U.S. (7th ed. 2015) at 1, available at http://www.gphaonline.org/media/wysiwyg/PDF/GPhA_Savings_Report_2015.pdf.

¹² At one time, payors relied on cost-based pricing metrics to reimburse pharmacies that dispensed drugs to their insured customers, paying the dispensing pharmacies an amount based on the manufacturer's list price for the drug, plus a small mark-up or dispensing fee. Over time, however, it was learned that the list price for most generic drugs published by their manufacturers was substantially higher than the actual cost incurred by pharmacies to acquire the drugs.

51. Generic drug manufacturers may charge different amounts for an equally interchangeable, *i.e.*, therapeutically equivalent, multisource drug. But manufacturers are usually constrained in their ability to price generic drugs by the Maximum Allowable Cost (“MAC”).¹³ MAC is a contractually based payment model that, in the private sector, is commonly established by a pharmacy benefits manager (“PBM”), who manages an insurance plan, and that is paid to the pharmacies within the plan’s network.¹⁴ A MAC price sets the upper limit that a pharmacy will be paid by the PBM for procuring and dispensing a particular generic medication.

52. While PBMs usually do not disclose publicly which drugs they subject to MAC pricing, what the MAC price is, or what factors they apply to set MAC prices, it is believed that PBMs rely on a wide-variety of market-wide pricing information or plan-specific data.¹⁵ In recent years, 79% of employer prescription drug plans and 45 state Medicaid programs have been using MAC prices to control the cost of generic drugs.¹⁶ MAC prices give pharmacies an incentive to procure and dispense the lowest-priced drug product available for a particular multisource drug. If a generic drug is subject to MAC pricing, a pharmacy purchasing a higher-

¹³ To define therapeutic categories, MAC pricing typically relies on the FDA’s Orange Book, which lists approved prescription drugs and their therapeutic equivalents. An “A”-rated drug is one that the FDA considers to be therapeutically equivalent to other pharmaceutically equivalent products. See U.S. FDA Website, Orange Book Preface, available at <https://www.fda.gov/Drugs/DevelopmentApprovalProcess/ucm079068.htm#tecode>.

¹⁴ Academy of Managed Care Pharmacy, *Where We Stand, Maximum Allowable Cost (MAC) Pricing* (Dec. 2013), available at www.amcp.org/Sec.aspx?id=9287. For the purposes of this complaint, MAC prices refer solely to prices that limit a pharmacy’s reimbursement for generic drugs, not the amounts PBMs charge to the insurance plans, which may also be referred to as a MAC price. See National Community Pharmacists Association, *The Need for Legislation Regarding "Maximum Allowable Cost" (MAC) Reimbursement*, available at <http://www.ncpa.co/pdf/leg/mac-one-pager.pdf>.

¹⁵ *Id.*

¹⁶ Express Scripts, *MAC Pricing Incents More Affordable Rx* (Feb. 24, 2016), available at <http://lab.express-scripts.com/lab/insights/drug-options/mac-pricing-incents-more-affordable-rx>.

priced generic product will make less profit or potentially even lose money when it dispenses a higher-priced product.¹⁷

53. MAC pricing is neither uniform, nor transparent and may be subject to frequent changes. So whether a generic manufacturer's products are even subject to MAC pricing or how that MAC pricing is set for any particular generic drug is not easy for the manufacturers to decipher. PBMs typically exercise control over the selection of generic medications that will be subjected to MAC pricing, and they fiercely guard the secrecy of their MAC price lists.¹⁸ Industry groups, like the Academy of Managed Care Pharmacy, actively oppose government regulation of MAC pricing and any efforts to disclose MAC prices or the method of calculating them.¹⁹

54. By setting a ceiling for reimbursement of any particular generic drug at the pharmacy level, MAC prices indirectly affect the price at which generic drug manufacturers may sell their products to direct purchasers. Because many generic drugs are subject to MAC pricing, generic drug manufacturers have an incentive to price their generic drug products competitively to maintain demand by pharmacies.

55. MAC pricing can penalize the generic drug manufacturer that raises price on its own when its competitors do not. A unilateral price increase in a competitive generic drug market that is subject to MAC pricing is likely to send buyers to a lower-price alternative. MAC pricing has little effect if generic drug manufacturers collectively increase their prices for a multi-source drug. First, PBMs generally permit pharmacies—who may be contractually obligated to dispense an unprofitable prescription—to challenge MAC prices under a MAC

¹⁷ See *supra* Academy of Managed Care Pharmacy article.

¹⁸ See *supra* National Community Pharmacists Association article.

¹⁹ See *supra* Academy of Managed Care Pharmacy article.

appeals process.²⁰ If the price of a generic drug has been increased by the majority of generic drug manufacturers, then these MAC appeals may be successful in getting the PBM to increase the MAC price allowed. Second, PBMs typically have a policy of revising MAC prices under certain contingencies.²¹ One large PBM, Express Scripts, for example, states that its MAC price list is frequently updated to reflect “the current market dynamics.”²²

56. MAC pricing provides yet another reason that Defendants’ stark increases in the price of Ursodiol are indicative of coordinated pricing activity. Knowing that they hold an overwhelming majority share of the market for Ursodiol, Defendants had the capacity to dictate the market price and to influence the MAC prices set by PBMs, but only if they acted collectively. Absent collusion, individual Defendants could not have increased their prices to the high levels they did (or maintain high prices in the face of a significantly lower competitor price) without incurring the loss of a significant volume of sales.

B. Defendants Conspired, Among Other Things, to Raise Ursodiol Prices.

1. Defendants’ dominance over Ursodiol sales permitted them to fix prices, and their abrupt price increases are otherwise inexplicable.

57. The market for Ursodiol is mature, as generic versions have been on the market for years. In 2015 alone, Defendants’ total revenue from direct sales of these products was approximately [REDACTED].²³ This compares to just [REDACTED] in 2013, a year before the price-fixing conspiracy.

²⁰ *Id.*

²¹ *Id.*

²² See *supra* Express Scripts article.

²³ Revenue, unit sales, and effective prices are obtained from QuintilesIMS Inc. (“IMS Health”). IMS Health is the largest vendor of physicians’ prescribing data in the United States and is widely relied upon in the pharmaceutical industry and elsewhere. As used in this complaint, “effective prices” represent actual transaction prices, as reported by IMS Health. Plaintiffs calculate Defendants’ effective prices based on IMS Health’s National Sales

58. A mature generic market, such as the market for Ursodiol, has several generic competitors. As noted above, because each generic is readily substitutable for another generic of the same brand drug, the products behave like commodities, with pricing being the main differentiating feature and the basis for competition among manufacturers. In a market free from collusive activity, over time, generics' pricing would naturally near (and stay near) the generic manufacturers' marginal costs.

59. At all times relevant for this lawsuit, there have been at least three manufacturers of Ursodiol on the market. Under accepted economic principles of competition, when there are multiple generics on the market, prices should remain at highly competitive, historic levels, and should not increase starkly as they did here absent anticompetitive conduct. Drastic increases in Ursodiol prices are themselves suggestive of Defendants' collective market dominance: if they did not already dominate the market, Defendants' pricing excesses would be disciplined because they would lose market share to non-colluding competitors.

2. Defendants' collective market dominance permitted them to collude.

60. At the outset of the Class Period in May 2014, Defendants dominated the market for Ursodiol with a roughly [redacted] share.²⁴ Similarly, during the Class Period, the Defendants dominated the market with about a [redacted] share.

Perspectives ("NSP") data, which "captures 100% of the total U.S. pharmaceutical market, measuring sales at actual transaction prices[.]" IMS Institute for Healthcare Informatics, HSRN Data Brief: National Sales Perspectives, at 1, *available at* https://www.imshealth.com/files/web/IMSH%20Institute/NSP_Data_Brief-.pdf.

Effective prices are calculated to multiple decimals. For ease of reference, prices in this complaint are rounded to the nearest cent. However, percentage increases are calculated based on the more precisely calculated price.

²⁴ Market share is calculated in this complaint by reference to IMS unit sales data.

[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]
[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]

76. Defendants' price increases coincide with increases reported by the Centers for Medicare & Medicaid Services:

4. As part of the conspiracy, Defendants set their WAC benchmarks essentially in lockstep.

77. Although MAC pricing has been implemented to discourage unilateral price increases of generic drugs by setting an upper limit, an individual manufacturer's WAC increase influences the actual prices paid by direct purchasers. This is the case here, where Defendants dominate the Ursodiol market and set their WACs at approximately the start of the Class Period at essentially the same prices even when it meant increasing the price as much as 1,034%:²⁵

²⁵ For ease of reference, WAC prices are rounded to the nearest cent, but the percentage increases are calculated on the actual reported WACs.

Product	Defendant	NDC	Old WAC	New WAC	Date of Increase	Percentage Increase
300 mg. cap.	Epic	42806-0503-01	\$0.45	\$5.10	6-May-14	1,034%
300 mg. cap.	Actavis	00591-3159-01	\$0.77	\$5.11	24-Jun-14	562%
300 mg. cap.	Lannett ²⁶	00527-1326-01	*	\$5.11	1-May-14	*

5. There are no shortages or other market changes that would justify Defendants' price increases.

78. During the Class Period, there was no significant increase in the costs of making Ursodiol, no significant decrease in supply, and no significant increase in demand. Nonetheless, there were extraordinary increases by each of the Defendants in the prices they charged their customers for Ursodiol. Such price increases in a commodity product for which there were no significant increases in costs or demand and no significant decrease in supply would not have been in each Defendant's unilateral self-interest absent the existence of a cartel.

79. Federal law requires that drug manufacturers report drug shortages.²⁷ Ursodiol is not listed on the FDA's list of Current and Resolved Drug Shortages and Discontinuations Reported to FDA. Ursodiol also does not appear on any archived lists of the American Society of Health-System Pharmacists ("ASHP") Current Shortage Bulletins from July 3, 2012, through today, nor does it appear on the current list of ASHP Resolved Shortage Bulletins (which includes drug shortages dating back to August 2010). None of the Defendants reported any drug

²⁶ Lannett first reported a WAC for this product on this date.

²⁷ FDA Safety and Innovation Act of 2012, Pub. L. No. 112-144, §§ 1001-1008, 126 STAT. 995, 1099-1108.

shortages or supply disruptions to the FDA in explanation for the supracompetitive pricing of Ursodiol.

80. Nor does any change in the marketplace explain the rising prices—at the outset of the Class Period in May 2014 Defendants dominated the market for Ursodiol with about a [REDACTED] share of the market, and likewise in the Class Period, Defendants maintained roughly [REDACTED] of the market.

C. Defendants Orchestrated Their Conspiracy Through In-Person Meetings and Other Forms of Communication.²⁸

81. During the Class Period, Defendants conspired, combined, and contracted to fix, maintain, and stabilize prices; rig bids; and engage in market and customer allocation concerning Ursodiol, which had the intended and actual effect of causing Plaintiffs and the other members of the proposed Class to pay artificially inflated prices above prices that would exist if a competitive market had determined prices for Ursodiol.

82. Beginning in May 2014, Defendants collectively caused the price of Ursodiol to increase dramatically. Defendants' conduct cannot be explained by normal competitive forces. It was the result of an agreement among Defendants to increase pricing and restrain competition for the sale of Ursodiol in the United States. The agreement was furthered by discussions held at meetings and industry events hosted by the GPhA, HDMA, MMCAP, NACDS, and ECRM, as well as other meetings and communications.

83. In formulating and effectuating their conspiracy, Defendants engaged in numerous anticompetitive activities, including, among other things:

- (a) Participating, directing, authorizing, or consenting to the participation of

²⁸ The allegations included in this section pertaining to the HDMA, MMCAP, NACDS, and ECRM are based in part upon documents produced to plaintiffs pursuant to subpoenas *duces tecum* issued in *In re: Propranolol Antitrust Litigation*, No. 16-cv-9901 (S.D.N.Y.).

subordinate employees in meetings, conversations, and communications with co-conspirators to discuss the sale and pricing of Ursodiol in the United States;

- (b) Participating, directing, authorizing, or consenting to the participation of subordinate employees in meetings, conversations, and communications with co-conspirators to engage in market and customer allocation or bid rigging for Ursodiol sold in the United States;
- (c) Agreeing during those meetings, conversations, and communications to engage in market and customer allocation or bid rigging for Ursodiol sold in the United States;
- (d) Agreeing during those meetings, conversations, and communications not to compete against each other for certain customers for Ursodiol sold in the United States;
- (e) Submitting bids, withholding bids, and issuing price proposals in accordance with the agreements reached;
- (f) Selling Ursodiol in the United States at collusive and noncompetitive prices; and
- (g) Accepting payment for Ursodiol sold in the United States at collusive and noncompetitive prices.

84. To sustain a conspiracy, conspirators often communicate to ensure that all are adhering to the collective scheme. Here, such communications occurred primarily through (1) trade-association meetings and conferences, (2) private meetings, dinners, and outings among smaller groups of employees of various generic drug manufacturers, and (3) individual private communications between and among Defendants' employees through use of the phone, electronic messaging, and similar means.

85. These secret, conspiratorial meetings, discussions, and communications helped to ensure that all Defendants agreed to participate in, implement, and maintain an unlawful bid rigging, price-fixing, and market and customer allocation scheme.

86. The industry intelligence-gathering reporting firm *Policy and Regulatory Report* has reportedly obtained information regarding the investigation of generic drug companies by the

DOJ, and has indicated that the DOJ is investigating the extent to which trade associations and industry conferences have been used as forums for collusion among competing generic drug companies.²⁹ The State AGs have similarly noted the centrality of trade associations and industry conferences in their investigation, stating that they have uncovered evidence that certain generic drug companies “routinely coordinated their schemes through direct interaction with their competitors at industry trade shows, customer conferences, and other events, as well as through direct email, phone, and text message communications.”³⁰

87. Defendants were members of numerous trade associations, which they used to facilitate their conspiratorial communications and implement their anticompetitive scheme to raise, maintain, and stabilize prices, rig bids, and engage in market and customer allocation concerning Ursodiol, including, but not limited to, GPhA, the NACDS, and HDMA. In addition, Defendants regularly attended industry events hosted by the MMCAP and the ECRM.

88. The GPhA (now called the Association for Accessible Medicines) is the “nation’s leading trade association for manufacturers and distributors of generic prescription drugs . . .”³¹ GPhA was formed in 2000 from the merger of three industry trade associations: the Generic Pharmaceutical Industry Association, the National Association of Pharmaceutical Manufacturers, and the National Pharmaceutical Alliance.

²⁹ Eric Palmer, *Actavis gets subpoena as DOJ probe of generic pricing moves up food chain*, FIERCEPHARMA (Aug. 7, 2015), available at <http://www.fiercepharma.com/story/actavis-gets-subpoena-doj-probe-generic-pricing-moves-food-chain/2015-08-07>.

³⁰ CTAG Website, Press Release, *40 State Attorneys General Now Plaintiffs in Federal Generic Drug Antitrust Lawsuit* (Mar. 1, 2017), available at <http://www.ct.gov/ag/cwp/view.asp?Q=588538&A=2341>.

³¹ GPhA, *Membership*, <http://web.archive.org/web/20150413013008/http://www.gphaonline.org:80/about/membership>.

89. GPhA's website touts, "[b]y becoming part of GPhA, you can participate in shaping the policies that govern the generic industry" and lists its "valuable membership services, such as business networking opportunities, educational forums, access to lawmakers and regulators, and peer-to-peer connections." GPhA's "member companies supply approximately 90 percent of the generic prescription drugs dispensed in the U.S. each year."

90. Defendant Actavis has been a regular member of the GPhA during the Class Period, and Defendant Lannett frequently attends GPhA meetings and events. Regular members "are corporations, partnerships or other legal entities whose primary U.S. business derives the majority of its revenues from sales of (1) finished dose drugs approved via ANDAs; (2) products sold as authorized generic drugs; (3) biosimilar/biogeneric products; or (4) DESI products."³²

91. Several of Defendant Actavis's high-ranking corporate officers have served on GPhA's Board of Directors, including Charlie Mayr, Chief Communications Officer (2013), and Doug Boothe, President and CEO (2012). Former Heritage CEO, Jeffrey Glazer, who pleaded guilty to federal criminal charges relating to the price fixing and other anticompetitive activity concerning generic drugs, also served on GPhA's board of directors.

92. The NACDS is a national trade association representing chain community pharmacies. Its members include generic drug manufacturers, wholesalers, and retail chain pharmacies. NACDS holds regular industry events, including annual and regional conferences, which Defendants and other generic drug manufacturers attended, including the annual Total Store Expo.

93. The HDMA (now called HDA) is a national trade association that represents "primary pharmaceutical distributors" which links the nation's drug manufacturers and more

³² *Id.*

than 200,000 pharmacies, hospitals, long-term care facilities, and clinics.³³ HDMA holds regular conferences where its members, including generic drug manufacturers, meet to discuss various issues affecting the pharmaceutical industry. HDMA members during the Class Period have included Defendants Actavis and Lannett.

94. According to its website, MMCAP is a “free, voluntary group purchasing organization for government facilities that provide healthcare services. MMCAP has been delivering pharmacy and healthcare value to members since 1985. MMCAP’s membership extends across nearly every state in the nation, delivering volume buying power. Members receive access to a full range of pharmaceuticals and other healthcare products and services; such as, medical supplies, influenza vaccine, dental supplies, drug testing, wholesaler invoice auditing and returned goods processing.”

95. MMCAP’s Charter provides that “[i]n 1989, the Minnesota Department of Administration, an agency of the State of Minnesota, began a cooperative purchasing venture program to procure pharmaceutical products at the best price possible for the benefit of any other state interested in participating in the program . . . In 1996, the cooperative purchasing venture was named Minnesota Multistate Contracting Alliance for Pharmacy . . . and currently provide healthcare-related contracting to state and local government members located across the United States of America. Total purchasers by MMCAP member facilities for all MMCAP programs exceed \$1 billion annually”

96. Representatives of Defendants Actavis and Lannett regularly attended MMCAP meetings during the Class Period.

³³ HDA, About, available at <https://www.healthcaredistribution.org/about>.

97. According to its website, ECRM conducts Efficient Program Planning Sessions that are made up of one-on-one strategic meetings that connect decision makers in an effort to maximize time, grow sales, and uncover industry trends.

98. At annual meetings organized by ECRM, generic drug manufacturers have scheduled meetings with generic drug buyers at chain drug stores, supermarkets, mass merchants, wholesalers, distributors, and buy groups for independents.

100. As further set forth below, meetings and events hosted by the GPhA, HDMA, NACDS, MMCAP, and ECRM were frequently held during the Class Period and attended by high-level representatives from each Defendant, including employees with price-setting authority.

101. For example, on October 1-3, 2012, GPhA held a meeting in Bethesda, Maryland that was attended by representatives of at least Defendants Actavis and Lannett.

103. On June 4-5, 2013, the GPhA held a meeting in Bethesda, Maryland that was attended by representatives from Defendants Actavis and Lannett.

104. On June 2-5, 2013, HDMA held its 2013 Business Leadership Conference (“BLC”) in Orlando, Florida that was attended by at least the following representatives from Defendants, who were key executives for generic drug sales and pricing:

- a. **Actavis:** Andrew Boyer, Senior Vice President, Generic Sales and Marketing; Mark Falkin, Vice President of Purchasing; Anthony Giannone, Director of National Accounts; and Maureen Barrett, Director of National Accounts; and
- b. **Lannett:** Grace Wilks, Director of Sales and Marketing; Kevin Smith, Vice President of Sales and Marketing; Robert Foley, Marketing Manager; and Tracy Sullivan, Director of National Accounts.

105. On August 10-13, 2013, NACDS held its 2013 Total Store Expo at the Sands Expo Convention Center in Las Vegas, Nevada. NACDS's August 2013 Total Store Expo was attended by at least the following representatives from all three Defendants, who were key executives for generic drug sales and pricing:

- a. **Actavis:** Andrew Boyer, President & CEO, N.A. Generics; Marc Falkin, SVP, Sales; Richard Rogerson, Executive Director, Pricing & Business Analytics; Napoleon Clark, VP, Marketing; Michael Dorsey, Director, National Accounts; Lisa Fiveash, National Accounts Rep; Anthony Giannone, Executive Director, Sales; Megan Gorman, Sr, Marketing Manager; Rob Hooper, Sr. Marketing Manager; Maureen Meehan, Director, National Accounts; and

b. **Lannett**: Arthur Bedrosian, President & CEO; William Schreck, COO; Justin McManus, Director, National Accounts; Kevin Smith, VP Sales & Marketing; Tracy Sullivan, National Accounts Manager; Laura Carotenuto, National Accounts Representative.

106. On October 28-30, 2013, GPhA held a meeting in Bethesda, Maryland that was attended by representatives from Defendants Actavis and Lannett.

108. On May 12-15, 2014, MMCAP held its National Member Conference in Bloomington, Minnesota. At MMCAP's 2014 National Member Conference, topics included

“RFPs under consideration for Pharmacy,” “contract evaluation,” and “pharmaceutical price increases.”

109. MMCAP’s May 12-15, 2014 National Member Conference was attended by at least the following representatives from Defendants, who were key executives for generic drug sales and pricing:

- a. **Actavis:** Mark Blitman, Executive Director of Sales for Government Markets;
- b. **Lannett:** Tracy Sullivan, National Accounts Manager.

110. On June 1-4, 2014, the HDMA held a BLC at the JW Marriott Desert Ridge in Phoenix, Arizona. The June 1-4, 2014 BLC was attended by at least the following representatives from Defendants, who were key executives for generic drug sales and pricing:

- a. **Actavis:** Maureen Barrett, Director, National Accounts, U.S. Generics; Marc Falkin, VP, Marketing, Pricing & Contract Operations; John Fallon, Director, National Accounts; Anthony Giannone, Executive Director, Sales; and
- b. **Lannett:** Kevin Smith, VP Sales & Marketing; Tracy Sullivan, Director, National Accounts; Grace Wilks, Director Sales & Marketing; Justin McManus, Director, National Accounts and Sales.

111. On June 3-4, 2014, GPhA held a meeting in Bethesda, Maryland that was attended by representatives from Defendants Actavis and Lannett.

112. On August 23-26, 2014, NACDS held its 2014 Total Store Expo at the Boston Convention Center in Boston, Massachusetts. NACDS’s August 2014 Total Store Expo was attended by the following representatives from all Defendants, who were key executives for generic drug sales and pricing:

- a. **Actavis:** Andrew Boyer, President & CEO, North America Generics; Marc Falkin, SVP, Sales; Richard Rogerson, Sr. Director, New Products, Business Analytics & Systems; Anthony Giannone, Executive Director, Sales; Cindy Stevens, Director, National Accounts; Maureen Meehan, Director, National Accounts; Christina Koleto, Pricing Manager; Randy Hurst, SVP & General Manager; David Buchen, EVP Commercial, N.A. Generics & International; Napoleon Clark, VP, Marketing; Ashley Delponte, Manager, Trade Marketing, Sales & Marketing; Michael Dorsey, Director, National Accounts; Megan Gorman, Sr. Marketing Manager; Rob Hooper, Sr. Marketing Manager;
- b. **Epic:** Ashok Nigalaye, Chairman & CEO; Angelo Mike Lupo, VP, Sales & Marketing;
- c. **Lannett:** Justin McManus, Director, National Accounts; Kevin Smith, VP Sales & Marketing; Tracy Sullivan, National Accounts Manager.

113. On October 27-29, 2014, GPhA held a meeting in Bethesda, Maryland that was attended by representatives from Defendants Actavis and Lannett.

114. In 2015, and 2016, Defendants continued to regularly attend trade-association meetings, conferences and events, including: (i) the February 9-11, 2015 GPhA Annual Meeting in Miami, Florida; [REDACTED]
[REDACTED]
((iii) the June 7-10, 2015 HDMA BLC in San Antonio, Texas; (iv) the June 9-10, 2015 GPhA meeting in Bethesda, Maryland; (v) the August 22-25, 2015 NACDS Total Store Expo in Denver, Colorado; (vi) the November 2-4, 2015 GPhA meeting in Bethesda, Maryland; (vii) the

June 12-16, 2016 HDMA BLC in Colorado Springs, Colorado; and (viii) the August 6-9, 2016, NACDS 2016 Total Store Expo in Boston, Massachusetts.

115. As uncovered in the State AGs' ongoing investigation, at these various conferences and trade shows, representatives from Defendants, as well as other generic drug manufacturers, discussed their respective businesses and customers. These discussions would occur at social events, including lunches, cocktail parties, dinners, and golf outings, that usually accompanied these conferences and trade shows. Defendants' employees used these opportunities to discuss and share upcoming bids, specific generic drug markets, pricing strategies, and pricing terms in their contracts with customers.³⁴

116. In conjunction with meetings at conferences and trade shows, representatives of generic drug manufacturers get together separately, in more limited groups, allowing them to further meet face-to-face with their competitors and discuss their business. In fact, high-level executives of many generic drug manufacturers get together periodically for what at least some of them refer to as "industry dinners."³⁵

117. A large number of generic drug manufacturers, including all Defendants here, are headquartered in close proximity to one another in New York, New Jersey, and eastern Pennsylvania, giving them easier and more frequent opportunities to meet and collude. For example, in January 2014, at a time when the prices of a number of generic drugs were reportedly soaring, at least thirteen high-ranking male executives, including CEOs, Presidents,

³⁴ See, e.g., Amended Complaint (Public Version) at ¶¶ 50-52, *Connecticut v. Aurobindo Pharma USA, Inc.*, No. 16-cv-2056 (D. Conn. Mar. 1, 2017), ECF 168, available at http://www.ct.gov/ag/lib/ag/press_releases/2016/20161215_gdms_complain.pdf.

³⁵ Id. at ¶¶ 53-60.

and Senior Vice Presidents of various generic drug manufacturers, met at a steakhouse in Bridgewater, New Jersey.

118. Generic drug manufacturer employees also get together regularly for what is referred to as a “Girls’ Night Out” (“GNO”), or alternatively “Women in the Industry” meetings and dinners. During these GNOs, meetings, and dinners, these employees meet with their competitors and discuss competitively sensitive information. For example, several different GNOs were held in 2015, including: (1) in Baltimore, Maryland in May, and (2) at the NACDS conference in August.

119. Through these various interactions, Defendants’ employees are often acutely aware of their competition and, more importantly, each other’s current and future business plans. This familiarity and opportunity often leads to agreements among competitors to fix prices or to allocate a given market so as to avoid competing with one another on price.

120. Defendants also routinely communicate and share information with each other about bids and pricing strategy. This can include forwarding bid packages received from a customer (*e.g.*, a Request for Proposal or “RFP”) to a competitor, either on their own initiative, at the request of a competitor, or by contacting a competitor to request that the competitor share that type of information.

121. Additionally, Defendants share information regarding the terms of their contracts with customers, including various terms relating to pricing, price protection, and rebates. Defendants use this information from their competitors to negotiate potentially better prices or terms with their customers, which could be to the ultimate detriment of consumers.

1. Investor communications demonstrate Defendants' intent to fix and maintain supracompetitive prices to realize record profits.

122. Defendants' public statements and admissions in their investor communications show that Defendants realized record revenues during the Class Period and emphasize a commitment to increasing generic pharmaceutical prices as well as maintaining them at supracompetitive levels.

123. **Lannett:** On February 7, 2013, Lannett's CEO Arthur P. Bedrosian stated in an earnings call:

I could just say that we're very capable of raising prices and we tend to sometimes lead the market. We see opportunities to raise a price, we take it. We don't sit back and wait for someone else to do it. So you might say we're a little more aggressive in the pricing arena. I'd just rather not focus on which products they were, which could negatively impact us and send the wrong message to my competitors who might think they can get my customers away by lowering the price.

124. On September 10, 2013, Bedrosian stated in an earnings call:

We're not a price follower. We tend to be a price leader on price increasing and the credit goes to my sales vice president. He takes an aggressive stance towards raising prices. He understands one of his goals, his objectives as a sales vice president is to increase profit margins for the company. And he's the first step in that process. I can reduce costs and manufacturing efficiencies, but it has to be combined with sales increase, a profit increase, as I should say, by the salespeople. And he's done a good job there. With 1 or 2 exceptions, we've tended to lead in the way of price increases. We believe that these prices are important. We need to try raising them. Sometimes, it doesn't stick and we have to go back and reduce our price, and other times it does. I am finding a climate out there has changed dramatically and I see more price increases coming from our competing – competitors than I've seen in the past. And we're going to continue to lead. We have more price increases planned for this year within our budget. And hopefully, our competitors will follow suit. If they don't, that's their issue. But our plan is to raise prices on any product that we think we can or we haven't raised a price.

125. During the same call, Bedrosian stated:

We're seeing more responsibility on the part of all of our competitors, I believe, because all of us are facing the same costs. . . So I would expect that all the companies are not going to behave like they have in the past. And I suspect you're going to see more price increases in the generic marketplace or certainly less price erosion in the marketplace because of that.

126. During the same call, Bedrosian was asked by analyst for a reaction to a competitor's recent and significant price increase on generic levothyroxine. Bedrosian responded: "You mean after I sent them the thank you note?" He then went on to say:

I'm always grateful to see responsible generic drug companies realize that our cost of doing business is going up as well. . . . So whenever people start acting responsibly and raise prices as opposed to the typical spiral down of generic drug prices, I'm grateful. Because Lannett tends to be active in raising prices.

127. On November 7, 2013, Bedrosian stated during an earnings calls:

I don't really see anything significant on the horizon that could cause us any pain, quite frankly. We're still conservatively run. We're still careful how we spend money. We still realize we're in a commodity business. While we're enjoying the success of the company, it's not getting to our heads in anyway.

128. On the same call, Lannett's CFO Martin Galvan signaled that these were just the "earlier days of the increase," and Bedrosian stated his belief that the "price increases that are going on in the industry [are] going to stick for all the companies."

129. On February 6, 2014, both Bedrosian and Galvan confirmed that the price increases were driving growth at Lannett. Galvan further stated that "We do believe strongly that there's sustainability in some of the price increases."

130. On May 7, 2014, contemporaneous with Lannett's first Ursodiol price increase, Bedrosian confirmed its Ursodiol price increases and touted "outstanding financial results for the quarter," driven by a "combination of price increases on key products and strong sales on existing products."

131. On November 3, 2014, Bedrosian described one of Lannett's "rational" competitors as one that would not do "anything crazy" such as "just going out and trying to grab market share." He went on to state:

So from my perspective, what we're seeing here is an opportunity to raise prices because everybody has accepted the fact that our costs are going up dramatically and less concerned about grabbing market share. We're all interested in making a profit, not how many units we sell.

So it's really a combination to those things. So I don't think Levo and Digoxin are the only products that would sit here and tell you I could raise prices on, because I believe any of the products in our product line, including products that we may have just gotten approved have those same opportunities underlying them. We look at the market and sometimes we're the first ones to raise a price, sometimes we're not. But we look at everything in line as a potential product to have a price increased on.

132. During the same call, Bedrosian also stated that he was "more positive now, more confident" that the "multiple-fold" increase on Ursodiol would continue. Galvan then confirmed that there will still more price increases on Ursodiol planned for the next quarter.

133. On February 4, 2015, Bedrosian stated during an earnings call:

If you're saying that the price increases that we've had in place, are they sustainable, and are they maintaining? My answer would be yes, they continue to hold up.

As far as whether we talked about any increases for this year, we don't usually give a guidance for that. We predict what our revenues will be for the year. We're not seeing any declines, generally speaking on the price increase products. So they continue to, let's say, level off at their new pricing.

134. Bedrosian further stated during the same call:

So I'm expecting these pricings to really sustain themselves to continue. I see people raising prices further, because the generic prices were so low, when you're 10% of the brand, that's not because the brand overpriced the product by 90%. It's because the generic marketplace has so much competition sometimes, people get desperate just to unload their inventory that they cut the prices.

We don't see that kind of behavior sustainable, and we don't see it going further into the future. I think you're going to find more capital pricing, more – I'll say less competition, in a sense. You won't have price wars. You are still going to have competition, because there's a lot of generic companies in the market. I just don't see the prices eroding like they did in the past.

135. On August 25, 2015, Bedrosian again signaled continuing price increases because they have been "sustainable" and because "it's a more rationale [sic] market we're in."

136. On August 23, 2016, Bedrosian summarized that price competition "usually doesn't get you to results you want. So, I think a lot of people have learned that lesson by now." He described a problem of "some of the dumber newer companies [that] continue to go down that path" of competing on price. Echoing the attitude of many price-fixers who seek to rationalize their misconduct, he equated "expertise" with raising prices, and contrasted it with "crazy behaviors" of companies who seek to gain market share by cutting prices. Bedrosian also said that these "occasional" competitors who attempted to compete on price were fortunately "maturing in the market in realizing they need to make it profit as well."

137. Lannett reported rising revenues in its U.S. generics business during the Class Period.

138. **Actavis:** During Actavis' October 29, 2013 earnings call, prior to the price increases on Ursodiol, Actavis Director Sigurdur Olafsson stated: "But there's opportunities to take pricing increases, and that is what has changed since maybe five years ago when there wasn't an opportunity."

139. During Actavis' August 5, 2014 earnings call, Actavis EVP David Buchen stated: "We have a very broad portfolio and we take pricing opportunities where we can."

140. During Actavis' May 11, 2015 earnings call, Actavis CEO Brenton Saunders stated:

So let me tackle generic pricing. . . . We haven't seen much of a change despite all the fanfare and publicity around drug pricing in generics. There are obviously a few products that go up. But the model for generics is price decreases as more competitors come into the market. That's just the way the business works. . . . That being said, the environment has remained pretty stable and favorable. So we don't expect that to change short term either.

141. On August 6, 2015, Saunders stated on an earnings call that the generics business "is doing very well, and the units that comprise it are firing on all cylinders as we prepare for the combination with Teva."

142. Actavis reported rising revenues in its United States generics business during the Class Period.

143. **Epic:** Epic is privately held and thus does not generally provide public communications to investors.

2. Industry commentary indicates collusion is a plausible explanation for the increase in Ursodiol prices.

144. Industry analysts agree that generic manufacturers' price hikes are consistent with a price-fixing conspiracy. For instance, Richard Evans at Sector & Sovereign Research wrote:

A plausible explanation [for price increases] is that generic manufacturers, having fallen to near historic low levels of financial performance are cooperating to raise the prices of products whose characteristics – low sales due to either very low prices or very low volumes – accommodate price inflation.³⁶

³⁶ See Ed Silverman, *Generic Drug Prices Keep Rising, but is a Slowdown Coming?*, WALL STREET JOURNAL (Apr. 22, 2015), available at <http://blogs.wsj.com/pharmalot/2015/04/22/generic-drug-prices-keep-rising-but-is-a-slowdown-coming/>.

145. According to one study, since 2013 approximately one in 19 generic drugs sold in the United States have undergone major price hikes that may be consistent with collusion:

Fideres Partners LLP, a London-based consultancy that works with law firms to bring litigation against companies, reported “anomalous pricing patterns” in scores of generic drugs sold in the U.S. from 2013 to 2016. It identified 90 medicines whose prices rose at least 250 percent over the three-year period and were increased by at least two drug companies around the same time, even though there was no obvious market reason for the increases. The average price jump among the 90 drugs was 1,350 percent, Fideres found.

“I don’t think the public or even the politicians in the U.S. have any idea just how widespread and extreme the phenomenon is,” said Alberto Thomas, one of Fideres’s founders.³⁷

146. Another study concluded that in 2014, “292 generic medication listings went up by 10% or more, 109 at least doubled in price and 14 went up by ten or more times in price that year.”³⁸ The GAO Report also noted similar “extraordinary price increases” across many generic drugs, including Ursodiol, in recent years that could not be linked to any particular cause.

147. Pennsylvania physicians through the Pennsylvania Medical Society called on state and federal governments to investigate surging generic prices, believing anticompetitive conduct was to blame:

According to Robert Campbell MD, chair of Physicians Against Drug Shortages and immediate past president of the Pennsylvania Society of Anesthesiologists, surging prices have hit hundreds of mainstay generics, including anesthetics, chemotherapeutic agents,

³⁷ Liam Vaughan and Jered S. Hopkins, *Mylan, Teva Led Peers in “Anomalous” Price Moves, Study Says*, BLOOMBERG (Dec. 22, 2016) available at <https://www.bloomberg.com/news/articles/2016-12-22/widespread-drug-price-increases-point-to-collusion-study-finds>.

³⁸ David Belk, MD, *Generic Medication Prices*, available at http://truecostofhealthcare.net/generic_medication_prices/.

antibiotics, and nutritional intravenous solutions. He believes the surging prices are a result of anti-competitive behavior.³⁹

D. Defendants' Conduct in Generic Drug Pricing Is Under Investigation by the United States Congress, the DOJ, and the State Attorneys General.

1. Congress launched an investigation in response to news reports of a dramatic rise in price of certain generic drugs.

148. As noted above, in January 2014 the NCPA sent correspondence to the United States Senate HELP Committee and the United States House Energy and Commerce Committee requesting hearings on significant spikes in generic pharmaceutical pricing.

149. On October 2, 2014, Senator Bernie Sanders (I-VT), Chair of the Subcommittee on Primary Health and Aging, Senate Committee on Health, Education, Labor and Pensions, and Representative Elijah E. Cummings (D-MD), the Ranking Member of the House Committee on Oversight and Government Reform, sent letters to 14 drug manufacturers requesting information about the escalating prices of generic drugs used to treat everything from common medical conditions to life-threatening illnesses.⁴⁰

150. On February 24, 2015, Senator Sanders and Representative Cummings sent a letter requesting that the Office of the Inspector General ("OIG") of the Department of Health and Human Services "examine recent increases in the prices being charged for generic drugs and the effect these price increases have had on generic drug spending within the Medicare and

³⁹ Pennsylvania Medical Society, Press Release, *Rising Generic Drug Costs Have Physicians Raising Red Flags* (Feb. 5, 2016), available at <http://www.prnewswire.com/news-releases/rising-generic-drug-costs-have-physicians-raising-red-flags-300216006.html>.

⁴⁰ U.S. Senator Bernie Sanders Website, Press Release, *Congress Investigating Why Generic Drug Prices Are Skyrocketing* (Oct. 2, 2014), available at <https://www.sanders.senate.gov/newsroom/press-releases/congress-investigating-why-generic-drug-prices-are-skyrocketing>.

Medicaid programs.”⁴¹ The OIG responded to the request on April 13, 2015, advising it would examine pricing for the top 200 generic drugs to “determine the extent to which the quarterly [Average Manufacturer Pricing] exceeded the specified inflation factor.”⁴²

151. In August 2016, the United States GAO issued its report finding “extraordinary price increases” on many generic pharmaceuticals including Ursodiol.⁴³

2. The DOJ launched a broad criminal investigation into anticompetitive conduct by generic drug manufacturers.

152. The DOJ opened a criminal investigation into collusion in the generic pharmaceutical industry on or around November 3, 2014. The DOJ also empaneled a grand jury in this District at about the same time.

153. Initial reports suggest that, at the beginning, the DOJ’s probe was focused on two generic drugs: digoxin and doxycycline. However, news reports, court filings, and other public statements have confirmed the sweeping nature of the DOJ’s investigation. Reportedly, the DOJ believes price-fixing between makers of generic pharmaceuticals is widespread, and its investigation could become the next auto-parts investigation, which is the DOJ’s largest

⁴¹ Letter from Bernie Sanders, United States Senator, and Elijah Cummings, United States Representative, to Inspector Gen. Daniel R. Levinson, Dep’t of Health & Human Servs. (Feb. 24, 2015), available at <http://www.sanders.senate.gov/download/sanders-cummings-letter?inline=file>.

⁴² Letter from Inspector Gen. Daniel R. Levinson, Dep’t of Health & Human Servs., to Bernie Sanders, United States Senator (Apr. 13, 2015), available at <http://www.sanders.senate.gov/download/oig-letter-to-sen-sanders-4-13-2015?inline=file>.

⁴³ GAO Report to Congressional Requesters, *Generic Drugs Under Medicare* (Aug. 2016), available at <http://www.gao.gov/assets/680/679055.pdf>.

prosecution to date.⁴⁴ According to sources cited by Bloomberg, the DOJ investigation already “spans more than a dozen companies and about two dozen drugs.”⁴⁵

154. At least two of the Defendants here have been ensnared in the DOJ’s ongoing probe. Epic is privately held and consequently has no obligation to disclose receipt of a subpoena.

155. **Actavis:** Defendant Actavis’s parent Allergan plc disclosed in public filings that it received a subpoena from the DOJ, on June 25, 2015, “seeking information relating to the marketing and pricing of certain of the Company’s generic products and communications with competitors about such products.”⁴⁶

156. **Lannett:** Defendant Lannett issued a press release on July 16, 2014, that it received a subpoena from the CTAG in connection with its investigation into whether “anyone engaged in a contract, combination or conspiracy in restraint of trade or commerce which has the effect of (i) fixing, maintaining or controlling prices of digoxin or (ii) allocating and dividing customers or territories relating to the sale of digoxin in violation of Connecticut antitrust law.”⁴⁷ In a quarterly report Lannett disclosed that on November 3, 2014, its “Senior Vice President of Sales and Marketing of the Company was served with a grand jury subpoena relating to a federal

⁴⁵ David McLaughlin and Caroline Chen, *U.S. Charges in Generic Drug Probe to be Filed by Year-End*, BLOOMBERG (Nov. 3, 2016), available at <https://www.bloomberg.com/news/articles/2016-11-03/u-s-charges-in-generic-drug-probe-said-to-be-filed-by-year-end>.

⁴⁶ Allergan SEC 2015 Form 10-K (Feb. 26, 2016), at 27, available at https://www.sec.gov/Archives/edgar/data/1578845/000156459016013478/agn-10k_20151231.htm.

⁴⁷ Lannett Website, Press Release, *Lannett Receives Inquiry from Connecticut Attorney General* (July 16, 2014), available at <http://lannett.investorroom.com/2014-07-16-Lannett-Receives-Inquiry-From-Connecticut-Attorney-General>.

investigation of the generic pharmaceutical industry into possible violations of the Sherman Act.”⁴⁸ Lannett reported: “The subpoena requests corporate documents of the Company relating to communications or correspondence with competitors regarding the sale of generic prescription medications, but is not specifically directed to any particular product and is not limited to any particular time period.”⁴⁹

157. Defendants are not alone. Numerous other generic manufacturers have likewise received subpoenas in connection with the DOJ’s and the State AGs’ broad investigations into anticompetitive conduct in the generic drug industry. Additionally, some of these generic manufacturers have disclosed that search warrants have been executed or that certain employees have been separately subpoenaed as part of these ongoing probes.

158. The fact that these companies received subpoenas from a federal grand jury is significant, as is reflected in Chapter 3 of the 2014 edition of the DOJ’s Antitrust Division Manual. Section F.1 of that chapter notes that when deciding whether to request the initiation of a grand jury investigation “staff should consider carefully the likelihood that, if a grand jury investigation developed evidence confirming the alleged anticompetitive conduct, the Division would proceed with a criminal prosecution.”⁵⁰ The staff request needs to be approved by the relevant field chief and is then sent to the Antitrust Criminal Enforcement Division.⁵¹ “The DAAG [Deputy Assistant Attorney General] for Operations, the Criminal DAAG, and the Director of Criminal Enforcement will make a recommendation to the Assistant Attorney General. If approved by the Assistant Attorney General, letters of authority are issued for all

⁴⁸ Lannett SEC Form 10-Q (Nov. 6, 2014) at 16, *available at* https://www.sec.gov/Archives/edgar/data/57725/000110465914077456/a14-20842_110q.htm.

⁵¹ *Id.*

attorneys who will participate in the grand jury investigation.”⁵² “The investigation should be conducted by a grand jury in a judicial district where venue lies for the offense, such as a district from or to which price-fixed sales were made or where conspiratorial communications occurred.”⁵³

159. Receipt of federal grand jury subpoenas is an indication that antitrust offenses have occurred.

160. That a target has reportedly applied for leniency is also significant.⁵⁴ As the DOJ notes on its web site (<http://www.justice.gov/atr/frequently-asked-questions-regarding-antitrust-divisions-leniency-program>):

5. Does a leniency applicant have to admit to a criminal violation of the antitrust laws before receiving a conditional leniency letter?

Yes. The Division’s leniency policies were established for corporations and individuals “reporting their illegal antitrust activity,” and the policies protect leniency recipients from criminal conviction. Thus, the applicant must admit its participation in a criminal antitrust violation involving price fixing, bid rigging, capacity restriction, or allocation of markets, customers, or sales or production volumes, before it will receive a conditional leniency letter. Applicants that have not engaged in criminal violations of the antitrust laws have no need to receive leniency protection from a criminal violation and will not qualify for leniency through the Leniency Program.

⁵² *Id.* at III-83.

⁵³ *Id.*

⁵⁴ Leah Nylen and Josh Sisco, *Generic drug investigation started small before ballooning to dozen companies*, MLEX (Nov. 4, 2016) (“While the Justice Department didn’t have a whistleblower at the beginning of the investigation, it is understood that [in the summer of 2016] a company applied for leniency, which grants full immunity to the first company to come forward and admit to cartel violations.”), available at <http://www.mlex.com/GlobalAntitrust/DetailView.aspx?cid=841053&siteid=191&rdir=1>.

The DOJ further provides that the leniency applicant must also satisfy the following condition, among others, to avail itself of the government's leniency: “[t]he confession of wrongdoing is truly a corporate act, as opposed to isolated confessions of individual executives or officials.” *Id.*

161. The DOJ's first charges were made on December 12, 2016, against two generic industry executives (Glazer and Malek) with criminal counts related to price collusion for generic doxycycline hyclate and glyburide. *See United States of America v. Jeffrey A. Glazer*, No. 2:16-cr-00506-RBS (E.D. Pa.); *United States of America v. Jason T. Malek*, No. 2:16-cr-00508-RBS (E.D. Pa.).

162. These cases allege that these former senior executives of generic drug maker Heritage Pharmaceuticals Inc. violated Section 1 of the Sherman Act by participating in conspiracies to fix prices, rig bids, and engage in market and customer allocation concerning generic glyburide and doxycycline. On January 9, 2017, both Glazer and Malek pleaded guilty to the charges. The DOJ charges mention that Glazer and Malek's co-conspirators included “individuals that [Glazer] supervised at his company and those he reported to at his company's parent[.]”⁵⁵ Sentencing for both Glazer and Malek was originally set for April 2017 but was later rescheduled to September 2017 as they continue to cooperate with the DOJ. Evidence reportedly unearthed in the State AGs' action shows that Malek compiled a large list of generic drugs and instructed employees to contact competitors to reach agreement to increase prices and engage in market and customer allocation, and that some of its competitors were willing to reach such agreement.

⁵⁵ Transcript of Jan. 9, 2017 Plea Hearing at 19, *United States of America v. Jeffrey A. Glazer*, No. 2:16-cr-00506-RBS (E.D. Pa. Jan. 18, 2017), ECF 24. A similar statement appears in the transcript from Malek's plea hearing.

163. The DOJ has intervened in MDL 2724 as well as numerous civil antitrust actions alleging price-fixing, bid rigging, and market and customer allocation of generic pharmaceuticals stating that these cases overlap with the DOJ's ongoing criminal investigation. For example, in a civil antitrust action related to the generic pharmaceutical propranolol, the DOJ intervened and requested a stay, stating that "the reason for the request for the stay is the government's ongoing criminal investigation and overlap of that investigation and this case," and that "the government's ongoing investigation is much broader than the [Glazer and Malek] informations that were unsealed."⁵⁶ The DOJ filed a brief with the United States Judicial Panel on Multidistrict Litigation noting that, "The complaints in those civil cases – which typically allege that a group of generic pharmaceutical companies violated Section 1 of the Sherman Act by conspiring to fix prices and allocate customers for a particular drug – overlap significantly with aspects of the ongoing criminal investigation."⁵⁷ As noted above, the DOJ also filed a motion for a stay of discovery in MDL 2724 stating that: "Evidence uncovered during the criminal investigation implicates other companies and individuals (including a significant number of the Defendants here) in collusion with respect to doxycycline hydiate, glyburide, and other drugs (including a significant number of the drugs at issue here)."⁵⁸

164. The DOJ's Spring 2017 Division Update notes that:

Millions of Americans purchase generic prescription drugs every year and rely on generic pharmaceuticals as a more affordable alternative to brand name medicines. The Division's investigation into the generics market, however, has revealed that some

⁵⁶ See Transcript of Hearing, *In re Propranolol Antitrust Litig.*, No. 16-cv-9901, ECF 112 (S.D.N.Y. Feb. 21, 2017).

⁵⁷ See Memorandum of Amicus Curiae United States of America Concerning Consolidation, *In re: Generic Digoxin and Doxycycline Antitrust Litig.*, MDL No. 2724, ECF 284 (J.P.M.L. Mar. 10, 2017).

⁵⁸ See Intervenor United States' Motion to Stay Discovery, *In re: Generic Pharm. Pricing Antitrust Litig.*, MDL No. 2724, ECF 279 (E.D. Pa. May 1, 2017).

executives have sought to collude on prices and enrich themselves at the expense of American consumers.⁵⁹

3. Led by the State of Connecticut, 45 attorneys general launched their own investigation of antitrust violations in the generic drug industry.

165. The State AGs' action was filed just days after the DOJ filed its first criminal charges against two former executives of Heritage Pharmaceuticals. According to the State AGs' complaint, the information developed through its investigation (which is still ongoing) uncovered evidence of a broad, well-coordinated, and long-running series of schemes to fix the prices and allocate markets for a number of generic pharmaceuticals in the United States. Although the State AGs' action currently focuses on doxycycline hydiate and glyburide, it alleges that the Plaintiff States have uncovered a wide-ranging series of conspiracies implicating numerous different generic pharmaceuticals and competitors. As reported by *The Connecticut Mirror*, the CTAG "suspected fraud on a broader, nearly unimaginable scale" and "new subpoenas are going out, and the investigation is growing beyond the companies named in the suit."⁶⁰ CTAG George Jepsen has called evidence that has so far been obtained in the State AGs' investigation "mind-boggling."⁶¹

166. CTAG George Jepsen confirmed the scope of the State AGs' action in the following press release:

My office has dedicated significant resources to this investigation for more than two years and has developed compelling evidence of collusion and anticompetitive conduct across many companies that

⁵⁹ DOJ Website, Division Update Spring 2017 (Mar. 28, 2017), available at <https://www.justice.gov/atr/division-operations/division-update-spring-2017/division-securer-individual-and-corporate-guilty-pleas-collusion-industries-where-products>.

⁶⁰ Mark Pazniokas, *How a small-state AG's office plays in the big leagues*, The Connecticut Mirror (Jan. 27, 2017), available at <https://ctmirror.org/2017/01/27/how-a-small-state-ag-office-plays-in-the-big-leagues/>. *The Connecticut Mirror* further reported that the DOJ grand jury was convened in this District shortly after the CTAG issued its first subpoena. *Id.*

⁶¹ *Id.*

manufacture and market generic drugs in the United States. . . . While the principal architect of the conspiracies addressed in this lawsuit was Heritage Pharmaceuticals, we have evidence of widespread participation in illegal conspiracies across the generic drug industry. Ultimately, it was consumers – and, indeed, our healthcare system as a whole – who paid for these actions through artificially high prices for generic drugs. We intend to pursue this and other enforcement actions aggressively, and look forward to working with our colleagues across the country to restore competition and integrity to this important market.⁶²

167. In filings with the United States Judicial Panel on Multidistrict Litigation on May 16, 2017 and June 13, 2017, the State AGs reiterated that their ongoing investigation is broad in scope and goes beyond doxycycline hyclate DR and glyburide.⁶³ The State AGs further stated that their doxycycline hyclate DR and glyburide action “encompass[es] illegal agreements – including with regard to Doxy DR – where prices remained constant (or remained higher than they would have been in a competitive market) as a result of customer or market allocation agreements designed specifically to avoid price erosion[.]” The State AGs also disclosed that they have entered into settlements with Glazer and Malek and that these settlements require Glazer and Malek’s cooperation with the State AGs.

168. During a conference call on July 27, 2017, W. Joseph Nielsen, an assistant AG for the State of Connecticut, said “he expects future actions by the group of states investigating price-fixing and market allocation in the generic drug industry” including “more lawsuits against additional generic manufacturers for additional drugs [and] lawsuits against high-level

⁶² CTAG Website, Press Release, *Connecticut Leads 20 State Coalition Filing Federal Antitrust Lawsuit against Heritage Pharmaceuticals, other Generic Drug Companies* (Dec. 15, 2016), available at <http://www.ct.gov/ag/cwp/view.asp?Q=588538&A=2341> .

⁶³ See Brief and Reply in Support of Plaintiff States’ Motion to Vacate Conditional Transfer Order (CTO-3), *In re: Generic Pharm. Pricing Antitrust Litig.*, MDL No. 2724, ECF 321 & 334 (J.P.M.L. May 16, 2017 & June 13, 2017).

executives for their roles in the collusion.”⁶⁴ Nielsen also stated that the States AGs realized very quickly that the generic drug industry is “set up structurally in a way that fosters and promotes collusion among generic competitors” and that the State AGs’ investigation “has expanded greatly to the point where we are now looking at numerous drugs.”

169. New York AG Eric T. Schneiderman also reported that the State AGs have “uncovered evidence of a broad, well-coordinated and long running series of conspiracies to fix prices and allocate markets for certain generic pharmaceuticals in the United States.”⁶⁵

170. The DOJ’s and State AGs’ investigations of alleged price-fixing and other unlawful conduct in the generic pharmaceutical industry are ongoing.

VI. THE URSDIOL MARKET IS HIGHLY SUSCEPTIBLE TO COLLUSION

171. Because Defendants’ anticompetitive conduct constitutes a conspiracy to fix prices and allocate market and customers, which is a *per se* violation of Section 1 of the Sherman Antitrust Act, Plaintiffs need not define a relevant market. However, there are features of the market relevant to this case that show both (i) that the market is susceptible to collusion and (ii) that the price increases were in fact the result of collusion and not the result of conscious parallelism.

172. Factors showing that a market is susceptible to collusion include in this case:

- (1) **High Level of Industry Concentration** – A small number of competitors (Defendants) control a virtually all market share for Ursodiol, as detailed above. In May 2014, at the outset of the Class Period the Defendants together

⁶⁴ Can Calik, *Future actions by state enforcers expected over generic drug collusion, Connecticut official says*, MLEX (July 27, 2017), available at <http://www.mlex.com/GlobalAntitrust/DetailView.aspx?cid=908454&siteid=191&rdir=1>.

⁶⁵ New York AG Website, Press Release, *A.G. Schneiderman Files Federal Antitrust Lawsuit With 19 Other States Against Heritage Pharmaceuticals And Other Generic Drug Companies* (Dec. 15, 2016), available at <https://ag.ny.gov/press-release/ag-schneiderman-files-federal-antitrust-lawsuit-19-other-states-against-heritage>.

accounted for roughly [REDACTED] of the market for these products.

- (2) **Sufficient Numbers to Drive Competition** – While the market for Ursodiol had a small enough number of competitors to foster collusion, the number of sellers was large enough that – given decades of experience with competitive generic pricing, and accepted models of how generic companies vigorously compete on price – one would have expected prices to remain at their historical, near marginal cost levels. With the number of generic competitors such as there were here, historical fact and accepted economics teaches that – absent collusion – prices would have remained at competitive levels.
- (3) **High Barriers to Entry** – The high costs of manufacture, intellectual property, development and testing requirements, and lengthy time delay related to regulatory approval and oversight are among the barriers to entry in the generic drug market. For example, the three Defendants that control virtually all of the Ursodiol market each sell Ursodiol pursuant to FDA approvals granted years before the price soared in 2013. Any potential new entrant would have to go through the lengthy ANDA-approval process before coming to market. The FDA has not approved any ANDA for the sale and marketing of Ursodiol during the Class Period, and it may take years for the FDA to approve any new ANDA if and when filed. By insulating against new entrants, these barriers to entry and others increase the market’s susceptibility to a coordinated effort among the dominant players to maintain supracompetitive prices.
- (4) **High Inelasticity of Demand and Lack of Substitutes** – For the majority of patients who rely on it, Ursodiol is a necessity that must be purchased regardless of price hikes. While there are other drugs on the market for the treatment of gallstones, there are significant barriers to changing treatments, and both patients and physicians are likely to prioritize medical considerations over price. This makes demand for Ursodiol highly inelastic.
- (5) **Commoditized Market** – Defendants’ Ursodiol products are fully interchangeable because they are bioequivalent to one another by FDA standards. Thus, all manufactured versions of Ursodiol are therapeutically equivalent to each

other and pharmacists may substitute one for another interchangeably.

- (6) **Absence of Non-Conspiring Competitors** – Defendants control virtually all of the market share for Ursodiol and have maintained supracompetitive pricing throughout the Class Period. Thus, Defendants have market power in the market for Ursodiol, which enables them to increase prices without loss of market share to non-conspirators.
- (7) **Opportunities for Contact and Communication Among Competitors** – Defendants participate in the committees and events of the GPhA, HDMA, MMCAP, NACDS, ECRM, and other industry groups, which provide and promote opportunities to communicate. The grand jury subpoenas to Defendants targeting inter-Defendant communications further support the existence of communication lines between competitors with respect to, among other things, generic pricing.
- (8) **Size of Price Increases** – The magnitude of the price increases involved in this case further differentiates them from parallel price increases. Companies seeking to test market increases need to take measured approaches. But here the increases are not 5% or even 10% jumps – the increases are of far greater magnitude. A rational company would not implement such large increases unless certain that its ostensible competitors would follow. Here, the price increases were enormous and despite the increases defendants gained market share.
- (9) **Reimbursement of Generic Drugs** – This market, as with many generic markets, has institutional features that would inhibit non-collusive parallel price increases. The reimbursement for generic pharmaceuticals to retail pharmacies is limited by MAC pricing, which is based on the lowest acquisition cost for each generic pharmaceutical paid by retail pharmacies purchasing from a wholesaler for each of a pharmaceutical's generic equivalent versions. As a result, the usual inhibition of a company to unilaterally raise prices is embedded in the generic reimbursement system.

173. Through their market dominance, Defendants have been able to substantially foreclose the market to rival competition, thereby maintaining and enhancing market power and

enabling Defendants to charge Plaintiffs and the proposed Class members inflated prices above competitive levels for Ursodiol through unlawful price collusion.

174. Through their market dominance, Defendants have been able to substantially foreclose the market to rival competition, thereby maintaining and enhancing market power and enabling Defendants to charge Plaintiffs and the proposed Class members inflated prices above competitive levels for Ursodiol through unlawful price collusion.

VII. CLASS ACTION ALLEGATIONS

175. Pursuant to Federal Rules of Civil Procedure 23(a) and (b)(3), Plaintiffs bring this action on behalf of a Class defined as:

All persons or entities that directly purchased Ursodiol (generic ursodiol 300 mg capsules) from one or more of the Defendants in the United States and its territories and possessions at any time during the period from May 2014 through the present (the “Class Period”).

Excluded from the Class are Defendants and their officers, directors, management, employees, subsidiaries, or affiliates, judicial officers and their personnel, and all governmental entities.

176. Members of the Class are so numerous that joinder is impracticable. Plaintiffs believe that there are dozens of Class members, geographically dispersed throughout the United States, such that joinder of all Class members is impracticable. Further, the Class members are readily identifiable from information and records maintained by Defendants.

177. Plaintiffs’ claims are typical of, and not antagonistic to, the claims of the other Class members, and there are no material conflicts with any other member of the Class that would make class certification inappropriate. Plaintiffs and all members of the Class were damaged by the same wrongful conduct of Defendants.

178. Plaintiffs will fairly and adequately protect and represent the interests of the Class and Plaintiffs’ interests are coincident with, and not antagonistic to, those of the Class.

179. Plaintiffs are represented by counsel who are experienced and competent in the prosecution of class action antitrust litigation.

180. Questions of law and fact common to the members of the Class predominate over questions that may affect only individual Class members because Defendants have acted on grounds generally applicable to the entire Class. Thus, determining damages with respect to the Class as a whole is appropriate. The common applicability of the relevant facts to claims of Plaintiffs and the proposed class is inherent in Defendants' wrongful conduct, because the overcharge injuries incurred by Plaintiffs and each member of the proposed class arose from the same collusive conduct alleged herein.

181. The common legal and factual questions do not vary among Class members and may be determined without reference to individual circumstances, and include, but are not limited to, the following:

- (a) Whether Defendants and their co-conspirators engaged in a contract, combination, or conspiracy to eliminate competition and thereby increase the prices of Ursodiol in the United States;
- (b) The duration and extent of the alleged contract, combination, or conspiracy between and among Defendants and their co-conspirators;
- (c) Whether Defendants and their co-conspirators were participants in the contract, combination, or conspiracy alleged herein;
- (d) The effect of the contract, combination, or conspiracy on the prices of Ursodiol in the United States during the Class Period;
- (e) Whether Defendants' conduct caused supracompetitive prices for Ursodiol;
- (f) Whether, and to what extent, the conduct of Defendants and their co-conspirators caused injury to Plaintiffs and other members of the Class; and
- (g) Whether the alleged contract, combination, or conspiracy violated Section 1 of the Sherman Act, 15 U.S.C. § 1.

182. Treatment as a class action is the superior method for the fair and efficient adjudication of this controversy, as it will permit numerous similarly situated persons or entities to prosecute their common claims in a single forum simultaneously, avoiding unnecessary duplication of evidence, effort, or expense that numerous individual actions would engender. The benefits of proceeding as a class action, including providing injured persons or entities a method for obtaining redress on claims that could not practicably be pursued individually, substantially outweighs any potential difficulties in management of this class action.

183. Plaintiffs know of no special difficulty to be encountered in the maintenance of this action that would preclude its maintenance as a class action.

VIII. ANTITRUST INJURY

184. During the Class Period, Plaintiffs and Class members directly purchased Ursodiol from Defendants. Because of the Defendants' anticompetitive conduct, Plaintiffs and Class members were forced to pay more for Ursodiol than they otherwise would have, and thus have suffered substantial overcharge damages at the hands of Defendants. This is a cognizable antitrust injury and constitutes harm to competition under the federal antitrust laws.

185. Defendants' unlawful conduct has successfully eliminated competition in the market, and Plaintiffs and Class members have sustained, and continue to sustain, significant losses in the form of artificially inflated prices paid to Defendants. The full amount of such overcharge damages will be calculated after discovery and upon proof at trial.

186. Defendants, through their unlawful conduct alleged herein, reduced competition in the Ursodiol market, increased prices, reduced choice for purchasers, and caused antitrust injury to purchasers in the form of overcharges.

187. Because Defendants' anticompetitive conduct is ongoing, Plaintiffs and the Class continue to pay supracompetitive prices for Ursodiol through the present.

IX. CLAIM FOR RELIEF – VIOLATION OF SECTION 1 OF THE SHERMAN ACT

188. Plaintiffs repeat and re-allege the foregoing as though fully set forth herein.

189. In violation of Section 1 of the Sherman Antitrust Act, Defendants entered agreements with one another concerning the pricing of Ursodiol in the United States. This conspiracy was *per se* unlawful price-fixing.

190. Each of the Defendants has committed at least one overt act to further the conspiracy alleged in this Complaint. Defendants' anticompetitive acts were intentional, were directed at the sales of Ursodiol in the United States, and had a substantial and foreseeable effect on interstate commerce by raising and fixing Ursodiol prices throughout the United States.

191. The conspiracy had its intended effect, because Defendants have benefited—and continue to benefit—from their collusion and the elimination of competition, both of which artificially inflated the prices of Ursodiol.

192. The contract, combination, or conspiracy had the following direct, substantial, and reasonably foreseeable effects upon commerce in the United States:

- a. Prices charged to and paid by Plaintiffs for Ursodiol were artificially raised, fixed, maintained, or stabilized at supracompetitive levels;
- b. Plaintiffs were deprived of the benefits of free, open, and unrestricted competition in the sale of Ursodiol in the United States market; and
- c. Competition in establishing the prices paid for Ursodiol was unlawfully restrained, suppressed, or eliminated.

193. As a direct and proximate result of Defendants' unlawful conduct, Plaintiffs and Class members have been injured in their business and property in that they have paid more for Ursodiol than they otherwise would have paid in the absence of Defendants' unlawful conduct. The full amount of such damages is presently unknown and will be determined after discovery and upon proof at trial.

194. Defendants are *per se* liable under Section 1 of the Sherman Act, 15 U.S.C. § 1, for the injuries and damages caused by their contract, combination, and conspiracy in restraint of trade as alleged herein.

195. There is no legitimate, non-pretextual, procompetitive business justification for Defendants' conspiracy that outweighs its harmful effect. Even if there were some conceivable justification, the conspiracy is broader than necessary to achieve such a purpose.

196. Defendants' unlawful conduct as alleged herein poses a significant and continuing threat of antitrust injury.

X. PRAYER FOR RELIEF

WHEREFORE, Plaintiffs and Class members pray for relief from this Court and request:

- A. Certification as a Class Action pursuant to Federal Rule of Civil Procedure 23, and appointment of Plaintiffs as Class Representatives and their counsel of record as Class Counsel;
- B. Adjudication that the acts alleged herein constitute unlawful restraints of trade in violation of the Sherman Act, 15 U.S.C. § 1;
- C. A judgment against Defendants, jointly and severally, for the damages sustained by Plaintiffs and the Class defined herein, and for any additional damages, penalties, and other monetary relief provided by applicable law, including treble damages;
- D. An award to Plaintiffs and Class members of pre-judgment and post-judgment interest at the highest legal rate provided by law from and after the date of service of the first-filed Complaint in this action;
- E. An award to Plaintiffs and Class members of the costs of this suit, including reasonable attorney fees; and
- F. An award of any further relief as the Court deems just and proper.

XI. JURY TRIAL DEMANDED

Plaintiffs hereby request a jury trial on all claims so triable.

Dated August 15, 2017
